

Secure Print Release Guide

All jobs sent to the Xerox Multi Functional Devices in Regus are setup with Secure Print.

The job is received at the printer and will not print until you type the Secure Print code used to print.

Use the following set of instructions to release your print job

Press the 'Job Status' button on the machine control panel

The 'Active Jobs' tab will appear. If you can see your job, highlight it and press [Release] and type your Passcode when requested

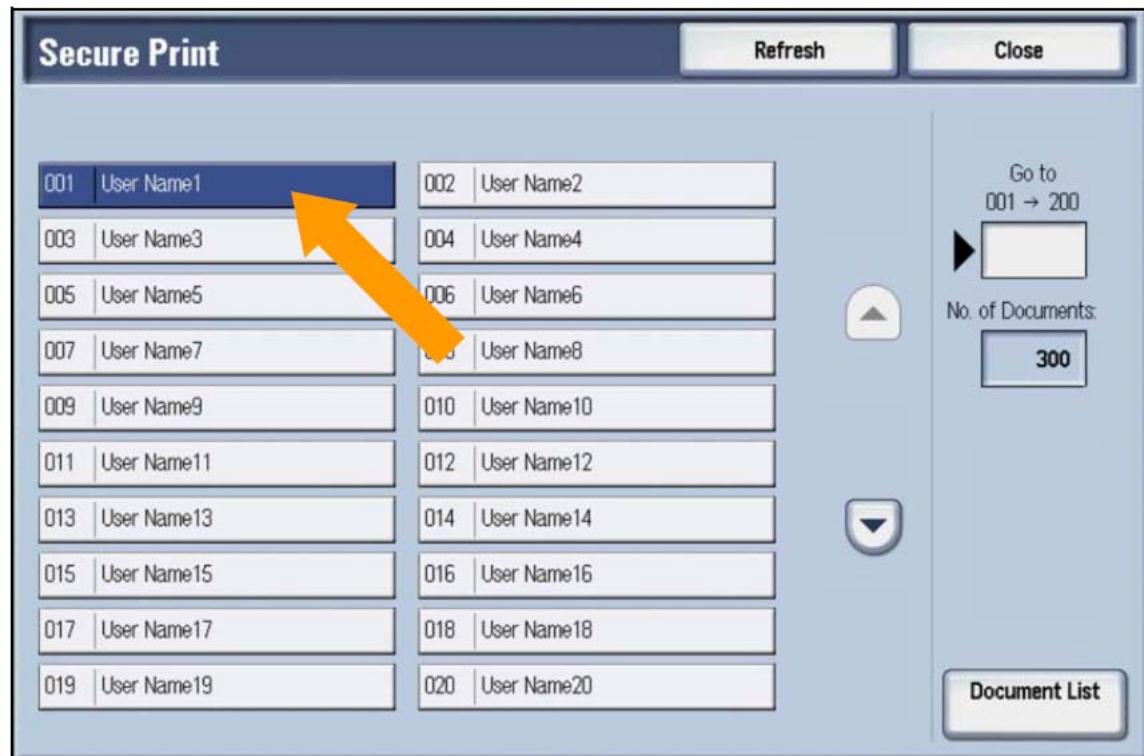

If you cannot see your job or you wish to release multiple jobs at the same time, Press the [Stored Documents] tab

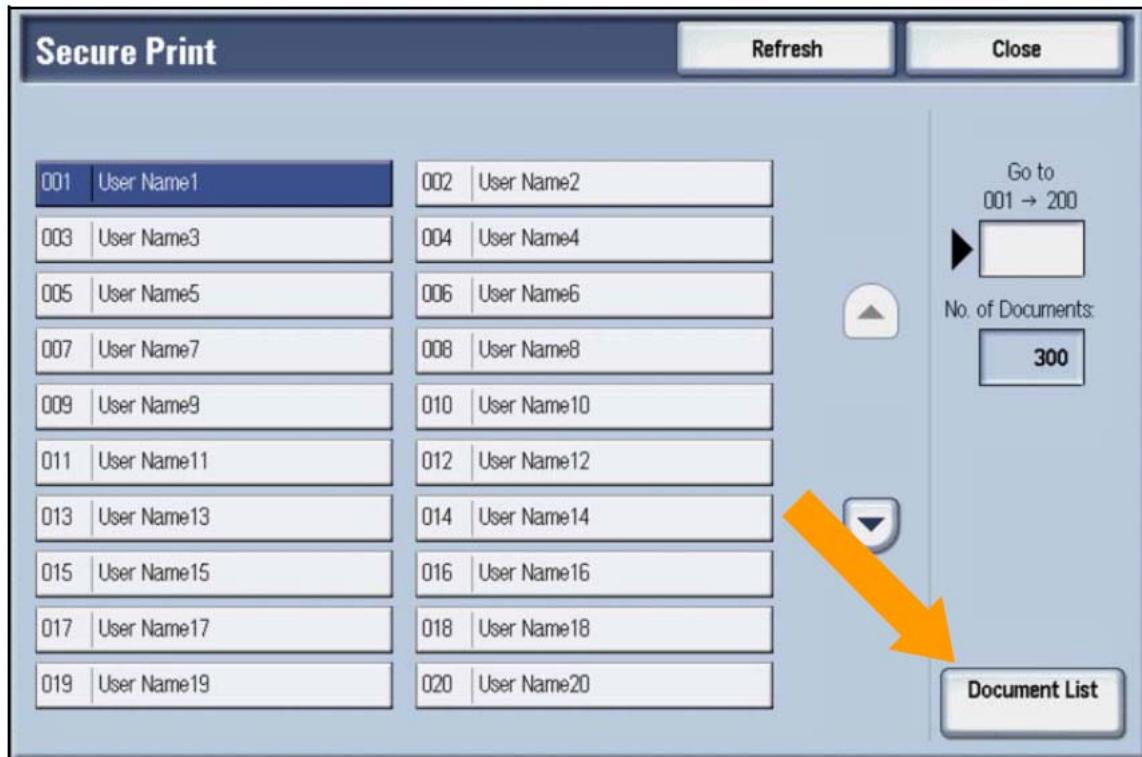

Press the [Secure Print] button

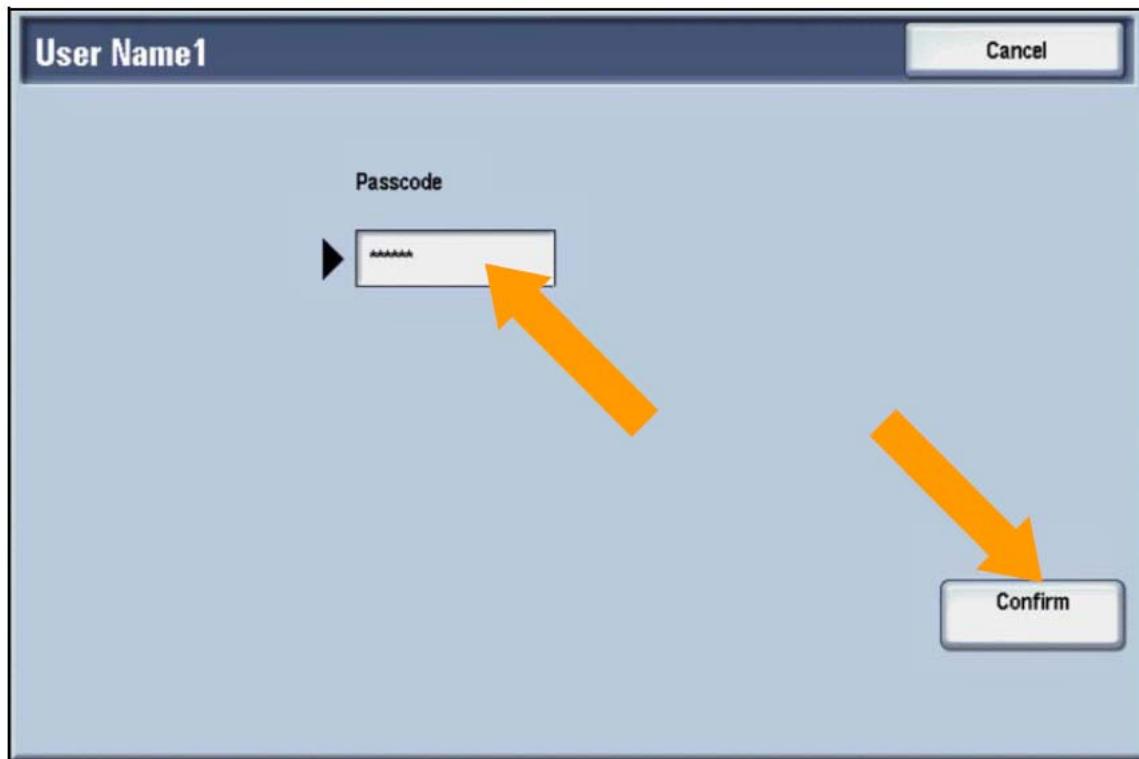

Press the appropriate [User Name]

Press the appropriate [Document List] button

Enter your *Client Ref* number using the keypad to the right of the LCD touch interface and press the [Confirm] button

Select the appropriate documents from the list shown or press the [Select All] button to select all the jobs your wish to print.

Mailbox 001 - Document List

Order	Document Name	Stored Date	Pages
<input checked="" type="checkbox"/> 1	 Doc Name101	2006/8/16	10:31AM 11
<input type="checkbox"/>	 Doc Name102	2006/8/16	10:31AM 12
