

# Xerox WorkCentre 7132 / 7228 / 7235 / 7245 Driver Installation Instructions

There are two steps to install the driver. If you feel you are proficient enough to download the compressed executable and install a driver in Windows, you can skip to Driver Configuration in Step 2, on page 11.

#### IMPORTANT INFORMATION

You must have local Administrator rights to perform the below steps.

Please ensure you **download the correct drivers** from the link available on the <u>www.xeretec.co.uk/regus</u> website.

These instructions are for the **models mentioned above only!** If your model is different, please select the correct link from the website above.

You need to have your **Regus Client Ref** number to hand. This can be obtained from your Regus Invoice or from the local Regus Centre Staff.

The **IP Address** and **Model Number** must be obtained from the local Regus Centre Team Staff within your site before you can continue with this driver installation.

#### **Driver Installation Steps**

#### Step 1 – Driver Download and Installation - Page 3

Download the compressed executable containing the drivers and extract to the pre-defined folder. The Add Printer Wizard will load automatically where you can add a local TCP/IP Port to print to the IP Address of the printer. You then select the location of the driver where you downloaded and extracted the files to.

#### Step 2 – Driver Configuration - Page 11

There are essentially two items to configure in the driver; Firstly, the Secure Print so your job will not be released at the device until you release it using your *Client Ref* number. Secondly, the Accounting which actually allows you to print to a Xerox device, providing you have been setup by the Regus Centre Team Staff.

Secure Print and Accounting are two separate features and your Client Ref is used in both cases for continuity.

# Before you begin

It is highly recommended that you position your windows so that you can run through the instructions and driver installation, side-by-side, as illustrated in the below screenshot.

# Step 1 - Driver Download and Installation

Note the device model you want to print to and click the appropriate driver link from the <u>www.regusprint.co.uk</u> website

# Click [Run] on the 'File Download' dialog box

The following windows will appear. Click [Install] to begin

🕎 Xerox Windows Printer Drivers	
The Printer Driver files will be extracted to "C:\Xerox\WC_7132_7228_7235_7245_Drivers"	You can copy this location for use later
After the files are extracted, the "Add Printer Wizard" will open. 1) Select the printer port or create a new one, click Next. 2) From the Manufacturer/Printers window, select "Have Disk". 3) Browse to C:\Xerox\WC_7132_7228_7235_7245_Drivers, select your printer INF, click "Open" then "OK". Destination folder C:\Xerox\WC_7132_7228_7235_7245_Drivers Installation progress	Right Click & select Copy or press Ctrl+C
Install Cancel	

### When the Add Printer Wizard appears, click [Next]

Add Printer Wizard				
	Welcome to the Add Printer Wizard			
	This wizard helps you install a printer or make printer connections.			
	<ul> <li>If you have a Plug and Play printer that connects through a USB port (or any other hot pluggable port, such as IEEE 1394, infrared, and so on), you do not need to use this wizard. Click Cancel to close the wizard, and then plug the printer's cable into your computer or point the printer toward your computer's infrared port, and turn the printer on. Windows will automatically install the printer for you.</li> <li>To continue, click Next.</li> </ul>			
	< Back Next > Cancel			

Select 'Local Printer attached to this computer' and click [Next]

# Select 'Create a new port' and select 'Standard TCP/IP Port' from the drop down menu and click [Next]

The 'Add Standard TCP/IP Printer Port Wizard' will load. Click [Next]

Add Standard TCP/IP Printer Port Wizard			
	Welcome to the Add Standard TCP/IP Printer Port Wizard		
	You use this wizard to add a port for a network printer.		
	Before continuing be sure that: 1. The device is turned on. 2. The network is connected and configured.		
	To continue, click Next.		
	< Back Next > Cancel		

# Type the IP Address of the printer into the 'Printer Name or IP Address' field and click [Next]

You can obtain the IP Address from the Regus Centre Team Staff

If you receive the following error message, please confirm the IP Address with the local Regus Centre Staff

Add Standard TCP	/IP Printer Port Wizard 🛛 🔀
	t Information Required could not be identified.
